FAIR TREATMENT OF CUSTOMERS

The Canadian Council of Insurance Regulators (“CCIR”) and the Canadian Insurance Services Regulatory Organizations (“CISRO”) issued a guide titled, “Guidance Conduct of Insurance Business and Fair Treatment of Customers.” There are also guidelines issued by some provincial regulators. Aviva supports Fair Treatment of Customers (FTC) and requires all insurance distributors to be aware of, and act in accordance with, all FTC guidelines for their jurisdictions.

The following outlines key points from the guide as they pertain to the Fair Treatment of the Customer. In their conduct of the business of insurance, Insurers and Intermediaries are expected to:

- act with due skill, care and diligence when dealing with Customers;
- maintain good and sound relationships between themselves and with the regulatory authorities;
- establish and implement policies and procedures on fair treatment of Customers, as integral parts of their business culture;
- act in compliance with the laws, regulations and guidelines to which they are subject;
- promote products and services in a clear, fair and not misleading manner;
- provide Customers with timely, clear and adequate pre-contractual and contractual information;
- take into account a Customer’s disclosed circumstances when that Customer receives advice and before concluding insurance contracts;
- avoid or properly manage any potential conflicts of interest before concluding an insurance contract;
- handle complaints in a timely and fair manner;
- have and utilize appropriate policies and procedures for the protection and use of Customer information; and
- have contractual arrangements between each other, that ensure fair treatment of Customers.

CUSTOMER COMPLAINTS - OFFICE OF THE OMBUDSMAN FOR AVIVA

Insurance companies are mandated by Regulators to have a robust complaint handling protocol and a Consumer Complaint Officer (Ombudsman) to address complaints that have not been resolved by the management within the involved business unit.

Important: if there is a customer complaint about a product or service and the insurance advisor is not able to resolve the concern within their authority and to the satisfaction of the consumer, the first step for the insurance advisor is to contact the appropriate department (underwriting, claims or billing) and escalate as needed.

If the customer feels the issues have not been fully addressed by the business or they remain dissatisfied with the position, you or the customer may contact the Office of the Ombudsman for the Aviva Group of Companies.

The Ombudsman is accountable to act as a trusted intermediary between the complainant and all departments within the Aviva Group of Companies. The Ombuds Team acts as an “Advocate of Fairness” to proactively identify issues and work towards a suitable resolution. They will consider the position as outlined by the business and all matters pertaining to the quality of service received to determine if there was fair and accurate adherence to policy/contract provisions, regulatory guidelines, service standards and internal processes. When the Aviva Group of Companies has acted in accordance with policy wordings and guidelines, the Ombuds Team will become an “Educator” helping the complainant understand the position. If needed, the Ombudsman will issue a Final Position Letter to the complainant on behalf of the Aviva Group of Companies. This letter will outline the final decision and provide the next step in the complaint process, which is to contact the General Insurance OmbudService (GIO).

If the complaint has not been resolved by the applicable business unit, you may contact the Office of the Ombudsman directly as follows:

Phone: 1-877-689-3634

Email: ombuds.ca@aviva.com

Mailing address: Office of the Ombudsman, 10 Aviva Way, Suite 100, Markham, ON L6G 0G1

FUEL TRUCK FOR CONTRACTORS AND FARMERS

Many farmers and contractors will convert or use pick-ups or other light commercial trucks to carry fuel for their own use in servicing their off-road tractors or contractors equipment. These vehicles will have permanently or temporary fuel tank(s) attached to transport the fuel. Rather than rate these vehicles with full petroleum class 48 rates, the following surcharge will apply:

Light Commercial < 5000 kgs*

- Use appropriated class 33, 35, 36, or 44 rates with 100% Third Party Liability surcharge.
- For class 34, apply a 200% Third Party Liability surcharge.

Heavy Commercial > 5000 kgs – Apply Petroleum – Class 48 rates

* Some “heavy duty” pick-ups (rear dual wheels) have GVW up to 5000 kgs, so will consider these vehicles as “light” for this particular surcharge.

FARM TRUCKS – RETAIL / WHOLESALE DELIVERY

Many farmers have seasonal or occasional wholesale or retail delivery, (harvest / planting seasons) which normally would result in amending class from Farm classes 33 or 34 to class 46 or other classes (either for the full term or during policy term). Rather than rate these vehicles with full Produce class rates, the following surcharges will apply:

Special Weight Classes will be used for farm vehicles, as follows:

Light	Up to 4500 kgs (10,000 lbs)
Medium- Heavy	From 4500 kgs to 11,000 kgs (24,000 lbs)
Super – Heavy	Over 11,000 kgs

GVW - Light or Medium Heavy

Seasonal Delivery – deliveries occur during specific times of the year according to the nature of the farming operation. Otherwise, vehicles are largely immobile for the rest of the year with limited road exposure.

Apply class 33 or 34 rates with a 100% surcharge to Third Party Liability, Accident Benefits and Direct Compensation premiums.

Delivery MUST be of owned goods.

Infrequent or Incidental Delivery

Delivery wholesale or retail must be less than once a week (not applicable if weekly trips to farmers market), with owned goods or infrequent hauling for others.

Class 33 or 34 rates apply – no surcharge.

Frequent Delivery

Deliveries are at least once a week (eg. farmers market retail delivery) of owned or goods of others.

Standard delivery rates apply per classification table. **No Farm Rates allowed.**

GVW - Super Heavy / Heavy Commercial

Due to weight and carrying capacity of these vehicles, **Farm Rates do not apply** – use appropriate class 41, 42, 44, 46, 49, 61, 62, 63, 64 rates, depending upon good carried and radius of operations, per classification table.

DISTANCE – RADIUS / MILEAGE SURCHARGE

The standard classification table is based on radius of operation of 160 kms or 100 miles for all but specified operations. To recognize the increased exposure from operations extending beyond the standard allowed radius of operations, mileage surcharges are applied. This surcharge is not intended to be a substitute for the classification system, so operation extending beyond specified frequency or radius must be rated to higher applicable class.

Risks outside of the table below – the appropriate “Truckmen” class would apply.

Radius of operation surcharge will apply to any vehicle occasionally operating beyond 160 kms (100 miles) for class 35 – 46, 49 risks, (excluding truckmen classes).

Canadian Radius Surcharge Table**

Standard Type of Use	Days/month operating outside the standard radius of operation	% of trips	Radius Surcharge
161km - 400 km	1-2	Up to 10%	10%
161km - 400 km	3-4	10 to 25%	25%
161km - 400 km	5-6	26% to 30%	50%

****Single vehicle basis**

Incidental Operations into United States of America (35 – 49 classes)** (excluding truckmen)

Maximum Distance	Days per month operation outside standard radius	% of trips per month	US Radius Surcharge
Up to 160kms	1 to 2 days	Up to 5%	20%
Up to 160kms	3 to 4 days	Up to 15%	40%
Up to 160kms	5 to 6 days	Up to 25%	60%

**** Single vehicle basis**

NOTE: US surcharge applies to any amount of incidental exposure.

NOTE: On a single vehicle if both US & Canadian radius surcharge applies, then only apply one surcharge.

METHOD OF RATING

1. **Truckmen Classes** 61, 62, 63, 64, 99 - Use Interurban Table
2. **All Other Commercial Automobiles** - Use Commercial Automobile premiums

Third Party Liability

1. Ascertain the business for which the vehicle is used.
2. Determine the "Class" for that business. Premiums are shown opposite each class under the appropriate territory.
3. If the business is not specifically listed, use the classification of a similar type of business – with similar exposures, or use Classification headed "All Commercial Vehicles Not Classified".

The premium for Third Party Liability (TPL) on a commercial vehicle is based on its classification and graded according to:

- a. The business of the Insured.
- b. Non-Delivery, Retail Delivery, Wholesale Delivery.
- c. Distance (Radius) - Length of trips, (take half the round trip).
- d. Hauling for others or owned goods.
- e. Gross Vehicle Weight (GVW) of the vehicle – Light or Heavy

NOTE: Where a tractor is insured, a Third Party Liability charge to haul a trailer will be made regardless of whether the Insured owns a trailer.

Accident Benefits

Rate according to class used for TPL and as shown in Premium Tables.

Direct Compensation

Rate according to the class used for TPL, use, GVW, rating territory, driving record, rate group and deductible level applicable.

Physical Damage

Rate according to the class as used for Third Party Liability, use, weight, rating territory, driving record, rate group and deductible level applicable.

TRAILERS (intended for use with Commercial Automobiles)

A. Third Party Liability

The Bodily Injury and Property Damage Premium is determined in accordance with the following schedule. The percentage charged applies to the premium of the highest rated automobile which may tow the trailer.***

TYPE OF TRAILER	PREMIUM RATE
1. Trailers which DO NOT supplement the load carrying capacity of the automobile.....	10%
2. Trailers which DO supplement the load carrying capacity of the automobile	
a. Semi-trailers*	10%
b. Trailers other than semi-trailers	25%
3. Farm trailers attached to trucks.....	25%

* Semi-trailer means a trailer attached to an automobile (tractor) by means of a kingpin or fifth wheel.

B. Accident Benefits

No charge.

C. Direct Compensation

Rate according to the vehicle classification, rating territory, driving record of the towing vehicle *** and the List Price New of the trailer, using the commercial rate group table located at the end of the rate group Section E, and the applicable deductible level.....

.....	35%
-------	-----

D. Physical Damage

All Perils

Add Collision premium to 100% of the Comprehensive premium.

Collision.....	70%
Comprehensive and Specified Perils	100%

Rate according to the vehicle classification, rating territory, driving record of the towing vehicle *** and the List Price New of the trailer, using the commercial rate group table located at the end of the rate group Section E, and the applicable deductible level.

Excess Trailers

Third Party Liability, Direct Compensation, Collision Premium:

Where the number of trailers other than “pup” trailers**, exceeds the number of applicable automobiles on the policy, charge:

- i. 100% or full trailer premium for the number of highest rated trailers equivalent to the number of applicable automobiles insured, and
- ii. 50% of the rate applicable to each remaining trailer (except where broker, owner-operators, or others will transport Insured’s trailers).

**A “pup” trailer is a trailer attached to another trailer being towed by a truck or tractor

TRAILERS (intended for use with Commercial Automobiles) (Cont'd)

Excess Tractors

Third Party Liability

Where the number of tractors exceeds the number of trailers on the policy, charge 10% loading on each excess tractor – for any non-owned trailer pulled by the tractor.

**** Include any special rating rules / class surcharges, eg. Sand & Gravel, Logging, etc, as shown in the Classes & Driving Records Section D*

INTELLIGENT UNDERWRITING CODES

The Commercial Vehicle Classification Table includes the “**Intelligent Underwriting Code**” associated with each commercial vehicle classification.

The Intelligent Underwriting Codes will be used for both Individually Rated Commercial Automobile (IRCA) and Fleet Business.

For IRCA business, Brokers are requested to follow the Intelligent Underwriting Code for risk classification and binding authority purposes.

The Intelligent Underwriting Codes are defined as follows:

K – Keen to Quote

Commercial vehicles identified within this code are expected to be in the “**low to medium hazard**” category. These represent our preferred classes – business we most want to retain, and in which we want to grow.

Brokers have the authority to bind risks with this code unless the classification table shows * beside the type of use, as long as basic underwriting acceptability criteria, such as driver information, vehicle age, condition, maintenance, verified loss experience, driving record, and radius of operations are satisfactory, and are within Broker’s Binding Authority as defined in the manual.

S – Special Circumstances Only

Commercial vehicles identified within this code tend to be in the “**medium to high hazard**” category. These classes are generally acceptable, but they are one in which we do not currently have a large volume. There may be regional expertise in some of these classes that may make them more attractive in your region.

Brokers have NO authority to bind risks with this code, but are encouraged to submit these risks with all the necessary underwriting information, to the Underwriter for consideration.

Aviva is a market for risks in this class only as long as they meet our underwriting acceptability criteria and are above average within their class of business. Please refer the business to your Branch to determine the local appetite.

N – Not for Aviva

Commercial vehicles identified within this code tend to be in the “**high hazard**” category. These represent classes we would refer to as declined classes and as such, should not be written.

Brokers have NO authority to bind risks with this code. Risks with **only incidental exposures** within these classes may be submitted to an Aviva Underwriter for consideration, along with all necessary underwriting information. To be acceptable to Aviva as an exception, the risk has to be excellent within its class, with all the necessary controls, limits, deductibles, and endorsements in place.

Aviva is generally not a market for commercial vehicles within this Intelligent Underwriting code.

FLEETS:

Fleets, due to their nature, will be treated “On its own Merits”.

Brokers have NO authority to bind fleet risks, but are encouraged to submit these risks with all the necessary underwriting information, to the Underwriter for consideration.

Aviva is interested in fleet business, with the following features making a fleet more attractive to Underwriters and hence “Keen to Quote”.

1. High proportion of automobiles falling within “K” – “Keen to Quote” classification.
2. High ratio of commercially rated to personal automobile / business rated automobiles.
3. Low claims frequency, where number of Claims per insured automobile is less than 1:4.
4. Stable fleet size, or with gradual growth / reduction in insured automobiles.
5. Higher ratio of newer model years versus older model years.
6. Management proactive and supportive of loss prevention.

A Fleet not meeting these characteristics will be considered “Special Circumstances”.

CLASS

Gross Vehicle Weight - means the curb weight of the vehicle plus the maximum load capacity.

Light (L): No more than 4,500 kgs (10,000 lbs) Gross Vehicle Weight as stated by the manufacturer.

Heavy (H): Over 4,500 kgs (10,000 lbs.) Gross Vehicle Weight as stated by the manufacturer.

For Commercial vehicles used for pleasure, with Gross Vehicle Weight of 4,500 kgs (10,000 lbs) or less, apply appropriate Private Passenger classes.

The rates published in this manual (except for truckmen or other specified classes) are for automobiles used locally, i.e. within a distance of 160 kms (100 miles) from their home garage.

Brokers must provide details of the actual radius of operations where automobiles are used to service territory beyond the 160 kms.

CAR WASH

Three types: Customer self-wash

Automatic Car Wash

Defined as a car wash with a mechanical conveyer or the Customer's automobile is driven by car wash employees. May often include interior cleaning or detailing.

An additional flat premium of **\$75 is applicable under 6.1 Legal Liability Collision.**

DEFINITIONS OF GARAGE OPERATIONS (Cont'd)

Specialty shops usually provide specific automobile service(s) such as oil and lubrication, mufflers, brakes, transmissions, glass & tinting, radiator repairs, audio equipment installation, or alarm installation.

DEFINITIONS OF GARAGE OPERATIONS (Cont'd)

NOTES:

Garage Policy

The garage automobile policy does not include premises or products liability.

Aviva recommends that C.G.L. policy should always be with the same company, with the same Third Party Limits, and same inception and expiry dates, to prevent any gaps in coverage, or any potential claims handling problems in case of overlapping coverage.

Leased Automobiles

Automobiles leased to or in the name of the garage, or any of its principals, must be insured separately under an Owner's Policy O.A. P. No. 1, due to exclusions and limitations in the Garage Policy. O.A.P. 1 would then be written in the name of the Lessor with an O.P.C.F. 5 attached and appropriate premium charged.

Owned Automobiles To Be Excluded

Aviva encourages the Owned Automobiles, for businesses that are not involved in the business of used or new car sales (includes incidental sales), to be excluded from the Garage Policy and properly insured with any appropriate OPCF form(s) under the Owner's Policy OAP #1. This allows client access to those endorsements not available under the Garage Policy.

When excluding owned automobiles, O.E.F. 71 must be attached and Insured's signature secured on the endorsement.

COMPREHENSIVE AND SPECIFIED PERILS

When requesting this coverage, provide full details of locations, values on hand (both inside and outside), previous loss history and of all security measures taken by the applicant to protect against loss or damage (lock-up procedures, watchmen, lighting, fencing, alarm systems, policy protection, etc). The theft portion of these coverages responds only to theft of the entire automobile if the loss occurs in an open lot or unroofed space owned, rented or controlled by the insured.

MONTHLY AVERAGE BASIS

Coverage is provided on a blanket basis subject to a limit of insurance applying at a specified location. Vehicles are insured while in use as well as in storage. The insured is required to report the actual cash value of all vehicles on hand at each location at the end of each month.

Premiums are computed monthly, subject to an advance premium of 75% of the estimated annual premium.

COINSURANCE BASIS

Coverage is provided on a coinsurance basis subject to a stated limit at each location. The limit of insurance must equal at least 80% of the actual cash value of the automobiles stored at that location. Except in the case of damage to one automobile, the insured will become a coinsurer in the event of loss if the sum insured at that location is found to be less than 80% of the actual cash value of the automobiles on hand.

RATING RULES

APPLICATION:

All garage rating is subject to receipt of a fully completed and signed Ontario Application for Automobile Insurance Garage Form (O.A.F. No. 4) and the AVIVA Garage Questionnaire, providing full details on all employees by occupational class and description of all business operations of the Insured.

When insuring owned automobiles a complete list of the automobiles is required including assigned drivers, use and operations, list price new, and total number of both regular and dealer plates.

Policy Premium Is Based On:

- (a) A rate per employee, based on occupational classification.
- (b) If owned automobiles are covered by the Garage Policy, owned vehicles must be rated according to Rating Criteria based on Territory, Use, Driving Record, and Coverage.
- (c) Where an employee or driver is under the age of 25, the Company may apply a premium surcharge.
- (d) Automobiles Owned by the Insured that are excluded under the terms of the Garage Automobile policy, by the use of the O.E.F. No. 71 – Excluding Owned Automobiles Endorsement, must be insured under an Owners Policy O.A.P. No. 1, at the applicable private passenger or commercial automobile rates.
- (e) Recreational or miscellaneous vehicles should be insured, under an O.A.P. No. 1, especially when additional endorsements, O.P.C.F # 2 – 46 inclusive are required, which are unique to the O.A.P. No. 1.
- (f) Coverage provided by the Garage Automobile policy, is only for the Applicant's operations as described under item 3 of the application/policy. If the Applicant conducts other business operations on the same premises, full details are required of such other business/ operations and the use of automobiles within the operation. The description of operations may need to be amended, or a separate OAP #1 may be required.
- (g) The Garage Automobile policy does not include premises or products liability and may not be written unless a Premises Liability policy is written with the Company.

Rating classification for owned automobiles:		Driving Record
Parts/Service	Light	36
	Heavy	45
Courtesy Cars		07
Demonstrators		07
Auto Supplied to:		
Active Partners & Full time Employees (Excluding Demos)		03
Others (As listed on OEF 76)		
rate according to Territory, Use, Driving Record, and Age of operator		

*Driving Record "0" should apply due to the unknown driver and experience. However, engine repair facilities may warrant a better driving record, where drivers may be more regular customers, compared to a body shop who's customers are not regular.

OCCUPATIONAL CLASSES OF GARAGE PERSONNEL

All employees are used for rating purposes, including non-drivers, secretaries, bookkeepers, etc. The rate levels reflect the limited exposure presented from the support staff.

All owners, partners, (silent or active) and employees must be identified and included.

- CLASS A** Proprietors, partners, executive officers, department managers
- CLASS B** Salespersons
- CLASS C** Mechanics, apprentice mechanics, parts delivery staff, lot persons, tow truck operators
- CLASS D** Body shop workers, service station attendants, full service station attendants
- CLASS E** Clerical, security staff, building maintenance staff, parts department staff, self- service gas attendants
- CLASS F1** Parking lot (park by customers only)
- F2** Parking lot (parking by attendants)

Driving Record 5

Owner or employee(s) has accident free experience, and no license suspension for 12 or more months, throughout the past five years

Driving Record 3

Owner or employee(s) has accident free experience, and no licence suspension for 12 or more months, throughout the past three years

Driving Record 2

Owner or employee(s) has accident free experience, and no licence suspension for 12 or more months, throughout the past two years

Driving Record 1

Owner or employee(s) has accident free experience, and no licence suspension the past one year.

Driving Record 0

Owner or employee(s) that does not qualify for D.R. "5", "3", "2" or "1".

INTELLIGENT UNDERWRITING CODES

The Garage Classification Table includes the "**Intelligent Underwriting Code**" associated with each type of operation.

The Intelligent Underwriting Codes are defined as follows:

K – Keen to Quote

Garage operations identified within this code are expected to be in the "**low to medium hazard**" category. These represent our preferred classes – business we most want to retain, and in which we want to grow.

S – Special Circumstances Only

Garage operations identified within this code tend to be in the "**medium to high hazard**" category. These classes are generally acceptable, but they are one in which we do not currently have a large volume. There may be regional expertise in some of these classes that may make them more attractive in your region.

Aviva is a market for risks in this class only as long as they meet our underwriting acceptability criteria and are above average within their class of business. Please refer the business to your Branch to determine the local appetite.

N – Not for Aviva

Garage operations identified within this code tend to be in the "**high hazard**" category. These represent classes we would refer to as declined classes and as such, should not be written.

Aviva is generally not a market for commercial vehicles within this Intelligent Underwriting code.
